COVID-19 In Wisconsin

Wisconsin now has several confirmed cases of COVID-19. Social distance and good hygiene is critical. Wash your hands with soap and water, cover your coughs, and if you are sick - stay home.

Flu Vaccine Effectiveness: Interim Estimate in the United States for 2019-2020 Season

In the last decade there have been:

- 4.3-21.0 million doctor visits
- 140,00-180,00 hospitalizations
- 12,000-61,000 deaths in the U.S.

VaxPro's Vice-President, Steve Nye, discusses important data in his most recent blog post regarding the effectiveness of the 2019-2020 flu vaccine.

At VaxPro flu shot clinics, our nurses administer only the quadrivalent influenza (flu) vaccine to patients. The World Health Organization (WHO) recommends that the following strains make up the quadrivalent flu vaccines for the 2020-2021 flu shot season.

- A/Guangdong-Maonan/SWL1536/2019 (H1N1)pdm09-like virus
- A/Hong Kong/2671/2019 (H3N2)-like virus
- B/Washington/02/2019 (B/Victoria lineage)-like virus
- B/Phuket/3073/2013 (B/Yamagata lineage)-like virus

Note that this recommendation is currently for egg-based vaccines in the northern hemisphere. For cell or recombinant-based vaccines, an A/Hawaii/70/2019 (H1N1)pdm09-like virus will be substituted for the A/Guangdong-Maonan strain.
